Fortafix High Temperature Adhesives

FORTAFIX FASTGLEAM – Premium Stove & Oven Glass Cleaner

FORTAFIX FASTGLEAM is an extremely effective glass cleaning solution that will dissolve and cut through grease and grime without marking the surface.

- Concentrated fast acting formula removes carbon & grease deposits effectively to leave a gleaming finish.
- For use on wood, coal or oil burning stoves, glass fire screens or fronts.
- Removes all the deposits sometimes left by incomplete combustion of coal or wood in solid fuel stoves.
- It clings to vertical surfaces to quickly dissolve smoke stains and tar/creosote deposits.
- The solution is safe to use on all hard surfaces; simply spray on, lightly agitate with a suitable brush or cloth and then wipe off with damp cloth.

FORTAFIX FASTGLEAM can be used on glass oven doors to remove grease. It will not damage painted or enamelled surrounds.

FORTAFIX FASTGLEAM can be used regularly on wood-burning stoves to avoid substantial accumulations of tar/creosote deposits on glass doors.

Directions for use

It is recommended that stove and oven glass doors are regularly cleaned - to avoid excessive stain build up

CAUSTIC SOLUTION

Before use – read instructions on aerosol canister carefully

- Ensure surface to be cleaned is cool.
- Shake FORTAFIX FASTGLEAM cleaner before and during use.
- Hold can upright at all times
- Spray apply on to the area to be cleaned from 20-30 cm
- Leave for up to five minutes.
 - Foam will coat surface initially, although during the 5 minutes time lapse, this will run off, so it is recommended that protection is put down to protect against this.
- Wipe off with a damp cloth, rubbing gently.
- Polish with an absorbent cloth or tissue.
- If stubborn stains remain, repeat using a nylon scouring pad.

Health and Safety / Environmental Information

- See separate MSDS sheet.
- RoHS Compliant.

Storage

- Aerosol canister - product should be stored in original packaging between 5 - 30°C.
- Shelf life – 12 months.
